About me

I am an IT undergraduate focused on the creative side of technology. My prominent skills are Graphic Design and Photography, complemented by my active development in UI/UX and video editing. I aim to combine my technical background with my creative expertise to deliver practical and high-quality digital experiences.

Education

BSc (Hons) in Management & Information Technology

University of Kelaniya
2023 - Present

CMJD - Comprehensive Master Java Developer

IJSE - Institute of Software Engineering
Completed on December 2023

Experience

Co-Founder & Creative Lead

2023 - Present

Minutes Digital

Co-founded an Digital Media agency serving diverse sectors. I lead visual production, covering corporate events and parties while executing product photography and brand design for business clients

Lead Graphic Designer

2023 - Present

Dessina.co

Lead designer focused on social media branding. I produce high-quality posts and visual assets that strictly align with client identities for a cohesive digital presence.

Projects

Pet Adoption System (Java Project)

Built a functional application to streamline pet adoption workflows. Applied Java OOP concepts for the core logic and connected a database to handle real-time inventory and user data management.

<https://github.com/osaadevs/Pet-Adoption-Project>

Snake Game (C++)

Built a console-based game using C++ to demonstrate core logic like real-time loops, collision detection, and dynamic state management.
